SEVENTEENTH-CENTURY ENGLISH NEWSPAPERS AND PERIODICALS

BY VIRGINIA S. BURNETT

No old newspaper can steal into the Rutgers Library unobserved by Miss Burnett and, fortunately, none is likely to find a way out past her watchful eye. In addition to her work with the newspaper files of the Library, Miss Burnett has been active in the work of the New Brunswick Historical Club. She has also begun publication of the records of early gravestones in the Presbyterian churchyard in Morristown.

In the bibliography of seventeenth-century English newspapers and periodicals which follows, the complete title entry given has always been taken from the first number that is to be found in the collection in the Rutgers University Library. In the case of title changes, those sufficient to affect the alphabetical arrangement of the list have been entered separately. The frequency of publication and the period of existence have been given following the title entry whenever they have been known or ascertained from two or more sources. When the place of publication has not been given, London is to be understood. Unless otherwise stated, the numbers listed are the original issues. Incomplete numbers are enclosed in brackets. Dates have been uniformly expressed in New Style. Issues dated for a period of time instead of with a single date (e.g. Thurs. Aug. 1 to Thurs. Aug. 8) have been given only the latter date (e.g. Aug. 8). A question mark after a date means that the date is inferential.

Paragraph one is of such interest that it is quoted in part: "Wee had (some yeares agoe) no Diurnals of our owne affaires in England. We did live then in so blessed a Time, that wee were onely curious, and desirous to heare forraigne Newes, and to know the state of other Kingdomes and Nations. And now by a strange alteration and vicissitude of Times wee talke of nothing else, but of what is done in England: and perhaps once in a fortnight, we hearken after Newes out of Scotland. It is true our owne Domestique affaires are of a greater concernment, then forraigne businesses; but yet, we may looke farther than home; partly to comfort us when we heare that although our neighbours are not imbroyled with Civill warres as we are: yet they are so wel imployed and so farre ingaged by their interests and pretences one against another, that they cannot very well frame any grand designe against us. Moreover, according as our severall inclinations and interests move us to rejoyce for the good success or to sorrow for the disasters that happen to our friends we desire to have some intelligence by which we may heare either of their welfare, or ill fortunes. Besides, it is requisite for Marchants, and for those that travell beyond Sea, or upon the Sea, to know (as neere as intelligence can be given) what forces are upon the Seas, and where the Armies quarter, that they may prevent many dangers, shun the meeting of foes, and seeke to joyne with their friends. These reasons have moved me to undertake this Weekly labour for the delight and profit of whom it may concerne ..."

This paper was supplemented by The Newes which was issued each Thursday from 3 Sept. 1663 to 21 Dec. 1663 as a separate paper. The two were correlated after no. 18 (Intelligencer, 28 Dec. 1663; Newes, 31 Dec. 1663), the numbering and pagination of the two made continuous, beginning again with no. 1, page 1. The Intelligencer continued to appear on Mondays and The Newes on Thursdays, the former having the odd numbers and the latter even numbers. L'Estrange made an attempt to replace The Intelligencer by issuing a Publick Intelligence on Tuesday, 28 Nov. 1665, without success.8

At least two numbers of The London Gazette were reprinted in the American colonies before the appearance of a regular colonial newspaper, an issue of Feb. 9, 1684/85 printed by Samuel Green in Boston, and one in 1696 by William Bradford of New York. Many American papers which wished to assume semi-official or authoritative positions employed the term “Gazette” thus recognizing the prestige of the London Gazette in its position as an official paper.4

The editorship of The London Gazette today is a government appointment. It is still published by authority and is the appointed organ for all announcements of the Executive.

L'Estrange states the purpose of the *Observator* in Vol. I, No. 1, as follows: "My business is, to encounter the Faction, and to vindicate the Government; to detect their Forgeries; to lay open the Rankness of their Calumnies, and Malice; to Refute their Seditious Doctrines; to expose their Hypocrisy, and the bloody Design that is carry'd on, under the Name, and Semblance, of Religion; And, in short, to lift up the Cloke of the True Protestant (as he Christens himself) and to shew the People, the Jesuite that lies skulking under it."

To the query, "Shall the *Observator* be a weekly paper, or how?" L'Estrange answers: "No, no; but oftner, or seldomer, as I see Occasion."
